DETAILED ACTION - ALLOWANCE

Claims 1-11 are allowed. All claims thus being allowable, prosecution on the merits is closed in this application. A statement of the examiner's reasons for allowance is provided in the paragraph which follows below.

Reasons for Allowance

The instant application is deemed to be directed to a nonobvious improvement over the invention(s) of Japanese Patent Laid-Open Application No. JP 11-258558 (Fuji Photo Film Ltd.) and/or Japanese Patent Laid-Open Application No. JP 2000-214804 (Fuji Photo Film Ltd.) disclosed by applicant as being a representative example in the art to which the instant invention pertains. In particular, said improvement provides an optimized spatial light modulator including a movable thin film membrane suspended over a support substrate; in which both the operating voltage is reduced and the switching speed increased, by including a returning electrode disposed on one side of the movable thin film, the one side being opposite to the support substrate, said returning electrode applying an electrostatic force which attracts the aforesaid movable thin film when a driving voltage is applied, as recited, *inter alia*, in applicant's sole independent claim (Claim 1, Lines 16-20). The prior art taken either singly or in combination fails to anticipate or fairly suggest the limitations of applicant's independent claims, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The claimed invention is therefore considered to be in condition for allowance as being novel and nonobvious over prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Drawings – Revisions Required

Figures 15 and 16 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application.

Art Unit: 2873

The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Other Remarks/Information

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kimura et al. (U.S. Patent No. 6,195,196) is based, in part, on Japanese Patent Laid-Open Application No. JP 11-258558. Kimura et al. (U.S. Patent No. 6,642,931) is based upon Japanese Patent Laid-Open Application No. JP 2000-214804 Copies of these references are not being furnished with this Office action. (See MPEP § 707.05(a).

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
